

INTERNATIONAL SYMPOSIUM & EXHIBITION

San Jose, CA
June 6 - 11, 2027

www.displayweek.org

Abstract/Technical Summary Format and Paper Submission Requirements

General Note: The selection-rejection decision for a paper is based on its originality, quality, relevance, and completeness.

TWO OPTIONS FOR PAPER SUBMISSION

Two options are available for authors who wish to submit papers. Please read both option and select carefully. **Submission deadline for both options is December 1, 2026.**

Option 1 is designed to streamline the process and allows authors to submit their paper in a format that is appropriate for final submission, instead of submitting the traditional abstract/summary format. If their papers are selected, authors do not need to do anything further, but have the option of submitting a final revised paper, if they wish.

Option 2 is the traditional process of submitting a 2–4-page Technical Summary for review, with the final paper being submitted later after notification of acceptance.

OPTION 1: Submit the full paper for consideration

Please follow the instructions and templates available on the [Preparation Instructions & Submission Guidelines](#) site to help in the preparation and submission of the 2–4-page technical paper.

If your paper is selected, this submission will be used as the final Symposium Digest paper unless a revised version is submitted by March 15, 2027.

Note that content-wise, the submission must contain the abstract and the information listed in the bullet points (1)–(7) below under Option 2.

OPTION 2: Submit a technical summary for consideration

The instructions below outline the submission requirements. If your paper is accepted, you will receive instructions for filing your final submission by March 15, 2027.

Page Headers: Please place the first author's name and the title of the paper on the top of each page of the submission.

Abstract: Your 50–70 word **maximum** abstract, highlighting the key details of your paper, will be published in the online program if your paper is accepted. Abstracts may be edited to accommodate the program format.

Keywords: Include a minimum of three keywords.

Technical Summary: Summary must not exceed 2–4 pages in length. Material beyond four pages will not be considered in the evaluation of the paper.

(1) Include the names of all authors with their affiliations, addresses, telephone numbers, and e-mail addresses. Please underline the name of the presenter when there are two or more authors.

(2) Indicate whether the presenter is a student.

(3) Objective and Background: Briefly describe the goals and intent of your project and provide background factors that led to the new results.

(4) Results: Describe the specific results that will be presented. Please provide a technical description of how the results were achieved. Sufficient detail (quantitative and/or graphical data) should be included so the Program Committee can properly evaluate your submission.

(5) Impact: Discuss the significance of your work and compare your findings with previously published work.

(6) References: List a few main references covering projects in related areas. We are requesting that authors use the Vancouver citation style.

(7) Prior Publication: Papers must be original contributions. If your organization has published or presented material on similar work in English, please explain how the present material differs or has been uniquely and significantly updated. Review papers of other work must reference all publications being discussed.

SUBMISSION PROCESS FOR BOTH OPTIONS

Once the abstract/technical summary is completed, all authors are required to upload it to

SID Abstract/Technical Summary Submission

Additional information must be provided on the online submission form. Authors must:

- (A)** Enter the full title of the paper.
- (B)** Enter the name of the contact author and e-mail.
- (C)** List all the authors and include their contact information as requested.
- (D)** Place the abstract in the allotted space on the form.
- (E)** Enter the keywords in the space provided.
- (F)** Check the appropriate box for student travel grant requests.
- (G)** Check the box agreeing that you will present your paper (if accepted) in person in San Jose in June.
- (H)** Indicate whether your paper is invited.
- (I)** Indicate if you wish to have your paper considered for oral or poster presentation, if you have a preference.
- (J)** Indicate up to 2 of the closest matching symposium topics from the list included in this Call for Papers. Designate first and second priority topics if 2 topics for your submission are appropriate. (The final designation will be determined by the Program Chair).
- (K)** Indicate a Special Topic from the list included in this Call for Papers, only if appropriate. The Special Topic selection is in addition to the primary technical topic(s) selected in (I).
- (L)** Attach a PDF of your technical summary.
- (M)** Click on submit.

If you need further assistance, please contact Bill Klein at wklein@sid.org.

The deadline for receipt of regular technical summaries/ abstracts is Dec. 1, 2026 (PST), with extensions available by request until no later than Dec. 31, 2026 (PST).

Manuscripts for the Late-News category can be submitted during Jan. 1–20, 2027 (PST). Notifications of acceptance will be emailed by Jan. 31 for regular papers, or by Feb. 6, 2027, for Late News submissions.

Authors of accepted papers will be directed to an online “Author’s Kit” with instructions for the preparation of the paper to be published in the Symposium Digest. The paper shall consist of 2–4 pages, including all illustrations, and is due no later than Mar. 15, 2027.

Note: If a revised paper is not received by Mar. 15, the initial summary and abstract submitted will be published in the Symposium Digest.

SPEAKER RESPONSIBILITIES

All costs associated with your participation at Display Week as a speaker will be at your own expense (including travel, housing, registration fee, etc.).

STUDENT TRAVEL GRANTS

A limited number of student travel grants, up to \$1000 each, will be made available to student presenters of accepted papers. A student travel grant must be requested upon submission of abstracts by checking off the appropriate box on the online submission site. A questionnaire will automatically be generated. Please complete the questionnaire. Only students who submit the questionnaire will be eligible to receive a student travel grant.
